FARHAN BINTANG ADRIANTO

Information Systems Student | Software Developer

Surabaya, Indonesia | farhanbintang323@gmail.com | +6281233862127 | linkedin.com/in/farhanadrianto | farhanba.vercel.app

PROFESSIONAL SUMMARY

Information Systems undergraduate at UPN "Veteran" East Java with a GPA of 3.682/4.00 and hands-on experience in full stack web and mobile application development. Skilled in Laravel, JavaScript, React, Kotlin, MySQL, and Firebase, with experience building multi-role management systems, SaaS-style dashboards, e-commerce platforms, and mobile productivity applications. Passionate about software engineering, UI/UX design, and developing scalable digital products with modern technologies.

EDUCATION

UPN "Veteran" East Java, Surabaya **2024 – Present**

Bachelor of Information Systems

Relevant Coursework: Database Management, Business Statistics, Web & Mobile Programming, Systems Analysis & Design, Information Systems Management.

SMA Negeri 17 Surabaya **2021 – 2024**

Senior High School – Science Major

PROJECTS

VeloDrive - Car Rental Management System

Role: Full Stack Developer | Laravel, MySQL, Tailwind CSS, Vite, Chart.js, React

- Developed a web-based Car Rental Management System supporting 2 user roles (Administrator and Customer) with role-based authentication, booking management, and responsive dashboard interfaces.
- Implemented 8+ core rental modules, including car inventory management, category management, booking workflows, payment proof verification, transaction status tracking, and customer management.
- Designed interactive dashboards and modern rental workflows using React, Tailwind CSS, HTMX, and Chart.js to visualize revenue analytics, booking statistics, and fleet availability with smooth page transitions.

Helpdesk Plus - IT Support Ticket Management System

Role: Full Stack Developer | Laravel, MySQL, Tailwind CSS, Vite

- Developed a web-based IT Support Ticketing System supporting 2 user roles (Administrator and Employee) with role-based authentication, ticket lifecycle management, and real-time notification system.
- Implemented 6+ core helpdesk modules, including ticket management, category management, priority workflows, status tracking, file attachments, and employee management.
- Designed intuitive dashboards and advanced filtering system using Tailwind CSS to visualize ticket statistics, status distribution, and notification feeds with responsive interfaces and automated ticket code generation for easy tracking.

iPhone Store E-Commerce Platform

Role: Full Stack Developer | JavaScript, Node.js, Axios, Duitku Payment Gateway API

- Developed a fully functional e-commerce platform for iPhone products with shopping cart management, dynamic quantity adjustment, and persistent cart storage using localStorage.
- Integrated Duitku Payment Gateway API with secure MD5 signature authentication and QRIS payment method, handling real-time transaction processing and payment URL redirection.
- Built serverless backend payment processing using Node.js deployed on Vercel, implementing RESTful API endpoints for checkout and automated merchant order ID generation.

SIMAK - Academic Management Information System

Role: Full Stack Web Developer | Laravel, MySQL, Chart.js

- Developed a web-based Academic Management Information System supporting 3 user roles (Administrator, Lecturer, and Student) with authentication, profile management, and academic information services.
- Implemented 4+ core academic modules, including course registration (KRS), lecturer approval workflows, student feedback management, and program-specific data administration.
- Designed interactive dashboards and reporting features using Chart.js to visualize student distribution, feedback analytics, and academic performance metrics.

AstraLearn - Learning Management System (LMS) Platform

Role: Full Stack Developer | PHP, Laravel, MySQL, Tailwind CSS

- Developed a role-based learning platform with 20+ pages managing teacher-student interactions, course enrollments, assignment submissions, and real-time progress tracking across unlimited courses and students.
- Created course management system supporting multi-format file uploads (up to 10MB), automated grading workflow, weekly scheduling with 7-day timetable, and material sequencing for structured learning paths.
- Integrated analytics dashboard tracking student performance metrics including completion percentage, average grades, pending submissions, and enrollment statistics with automated calculation and real-time updates.

Hanzmoni – Offline Music Player

Role: Frontend Developer | HTML, CSS, JavaScript

- Developed an offline music player supporting 12+ songs with real-time search, responsive UI, and queue pagination.
- Implemented 10+ playback features using the HTML5 Audio API, including play/pause, next/previous, shuffle, loop, playback speed, volume control, progress tracking, and localStorage persistence.
- Designed a modern glassmorphism interface with responsive layouts, animated equalizer, interactive playlist navigation, and mobile-friendly user experience.

StudyMate – Academic Task Reminder Mobile App

Role: Mobile Developer & UI/UX Designer | Kotlin, Firebase, Android Studio, Figma

- Developed an Android task management application featuring 5+ core functionalities, including authentication, task management, deadline tracking, reminders, and real-time synchronization using Kotlin and Firebase.
- Implemented Firebase Authentication and Firebase Realtime Database while designing 10+ mobile interfaces to support secure access and seamless user experiences.
- Created user flows, high-fidelity prototypes, and user-centered designs in Figma, ensuring design consistency and effective implementation across application features.

Food Store Management System – Point of Sale (POS) Application

Role : Full Stack Developer | VB.NET 2022, MySQL, Crystal Reports

- Developed a Point of Sale (POS) application for food sales management, including menu selection, transaction processing, and receipt generation.
- Designed and implemented a MySQL database to manage menu, pricing, and sales transaction data while automating sales calculations and invoice generation.
- Generated sales reports and printable receipts using Crystal Reports to support operational monitoring and transaction documentation.

Coffee Shop Management Desktop Application

Role: Java Developer | Java Swing, OOP, NetBeans

- Developed a desktop application for managing customer records, product catalogs, and purchase transactions through a graphical user interface.
- Built an interactive Java Swing interface consisting of multiple management modules for customer, product, and transaction operations.
- Implemented an automated loyalty system with point calculation and 3-tier membership classification (Bronze, Silver, Gold).

EcoManage – Smart Waste Management Mobile App (National UX Design Competition)

Role: UI/UX Designer | Figma, Maze, Design Thinking

- Contributed to the design of a Smart Waste Management application recognized as a Top 23 National Finalist in a UX Design Competition.
- Developed wireframes, information architecture, user flows, and high-fidelity prototypes covering multiple user journeys and waste management services.
- Conducted usability testing using Maze and analyzed user feedback to identify usability improvements and optimize the user experience.

ORGANIZATIONAL EXPERIENCE

Various Student Event Committees – UPN "Veteran" East Java **Dec 2024 – Nov 2025**

Committee Member

- Supported the execution of multiple university events through event operations, logistics coordination, and participant management.
- Served as Master of Ceremony (MC), facilitating event sessions, coordinating timelines, and ensuring programs ran according to schedule.
- Managed venue preparation, operational activities, and participant flow to support smooth event execution.

CERTIFICATIONS

- Generative AI Fundamentals and Applications — Codepolitan [Credential]
- Microsoft Office Productivity Training — Microsoft & Virtual Education Academy [Credential]

SKILLS & TOOLS

- **Hard Skills:** HTML/CSS, PHP, JavaScript, Java, Kotlin, Laravel, Node.js, Firebase, MySQL, Tailwind CSS, REST API Integration, UI/UX Design
- **Soft Skills:** Teamwork, Leadership, Analytical Thinking, High Initiative, Time Management, Strategic Communication, Problem Solving, Cross-Functional Collaboration
- **Tools:** Visual Studio Code, Android Studio, Visual Studio 2022, NetBeans, GitHub, Figma, Microsoft Word, Microsoft Excel
- **Languages:** Indonesian (Fluent), English (Intermediate)
